STREETLIGHT DATA

BACKGROUND
Young Professionals in Transportation International (YPT) was created to fill the void presented to young professionals in the large, established transportation organizations. YPT aims to give young professionals the opportunities to take leadership roles, participate in networking events, and grow their careers. As part of that effort, YPT has established an annual awards program that aims to go beyond the standard "Emerging Star" category that is often the only category that YPT members would be eligible for in other organizations.

AWARD CATEGORIES

PROJECT OF THE YEAR
EXCELLENCE IN INNOVATION/RESEARCH
STREETLIGHT DATA GRADUATE FELLOWSHIP

SPONSORS

StreetLight Data pioneered the use of big data analytics to help transportation professionals solve their biggest problems. Applying proprietary machine learning algorithms to over 4 trillion mobile location data points, the company measures diverse travel patterns and makes them available on demand via the world’s first SaaS platform for mobility, Streetlight InSight®. From identifying sources of congestion to optimizing new infrastructure to planning for autonomous vehicles, Streetlight powers more than 1,500 projects globally every month.
